The

THE  
ANATOMIE OF THE BODIE  
of MAN, as the parts thereof are attributed  
to the twelve Constellations of Starres  
in the Zodiaque, &c.

V Aries the Head and face,

♉ Taurus  
Neck and  
Throate.

♋ Cancer  
Breast,  
Stomack,  
and Ribs.

♍ Virgo  
Bowels  
and Belly

♏ Scorpio  
Secret  
members.

♐ Capricornus  
Knees.

♊ Gemini  
Armes &  
Shoulders.

♌ Leo  
Heart and  
Back.

♎ Libra  
Reines &  
Loines.

♐ Sagittarius  
Thighes.

♑ Aquarius  
Legges.

♊ Pisces the feet.

**T**He horned *Roume* the head; the *Bull* neck strong;  
The *Twins* the armes; the *Crab*-fish brest doth wrongs  
The *Lyon* heart strong; *Virgine* belly tender;  
*Ballance* reines; *Scorpion* secret griefes ingender;  
*Shooter* thighes; lustfull *Goat* the knees doth shake;  
*Water* and *Fish* makes legges and feet to quake.

¶ Of Yeares, Moneths, Weeks, and Daies.

**T**he Iulian yeare beginneth the first of Ianuary  
 The Gregorian begins the 12 of our Decemb.  
 The Church of England, in Law-cases, Marc. 25 and con-  
 The yeare of the Kings Reigne, March 27 taineth  
 The States of Florence, Siens, and Pisa, Mar. 25 365  
 The Empire (as the Iulian) the first of Ianuary dates,  
 The Church of Rome, on their 25 of December  
 The Egyptians and Persians the 18 of our Iuly,  
 The Arabians, and most people of Asia, September 13.  
 The Hebrewes, Greeks, Sarazens, & Turks, 12 mon. Lunar.  
 The Tropicall (or true Solar yeare) beginneth at the  
 Vernal Equinox, and containes 365 daies, 5 hour. 50. min.  
 The Syderall or Starre yeare, beginneth when the Sun  
 is with the first starre of Aries, of 365 daies, 6 hour. 6 min.

Of Moneths.

**T**he moneth { Solar, is the continuance of the Sun in one Signe.  
 Of Apparition, is 28 daies, or foure weeks.  
 Of Paragratiō, is 27 daies and 8 houres.  
 Of Consecutiō, is from new Moon to new Moon.  
 For use of money, is according to the Kalender.

Of a Week.

A weeke hath the name in Latine Septimana, or seaven  
 mornings; yet we commonly call it 7 nights; or in brieve, a  
 Seantight.

The week beginneth on Sunday morning, about mid-  
 night; so that our Sunday is the first day of the week, cal-  
 led Dies Dominicus, the Lords day.

Of a Day.

A day Artificiall is the time betwixt Sun rising and  
 Sun setting; and the night from Sun set to Sun rise.

A day Naturall is the time of 24 houres, the beginning  
 whereof with us in England, & the Romanes is at midnight.

The Athenians at Sun setting, the Babylonians at Sun  
 rising. The Vmbrians and Astronomers at Noon.

JANVARIETHATH XXXI daies.

- Last quart. the 6 day, at 6 in the Morning.  
 New Moon 14 day, 20 min. past 9 Morning  
 First quart. 22 day, at 7 in the Morning.  
 Full Moon 28 day, at ten at Night.

3 Sun. in Adv.

Ember weeke

Ordination of Ministers,

## *Peregrine Rivers. 1629.*

### *The Description of the foure Quarters of this present Yeare, 1629.*

#### *First of the Winter Quarter.*

**T**he Winter Quarter (according to the Motion of the Sunne) began the eleventh day of December, in the last yeare 1628. At which time the Sunne entred into the first minute of Capricorne, he being then in his greatest South declination from the Equinoctiall line, viz. 23 degrees and one halfe. He being then 47 degrees more Southerly from us, then he will be the eleventh day of June next ensuing. By reason whereof, the daies Artificiall, viz. from Sunne rising to Sunne setting, with us will then be at the longest, which now are at the shortest: And what length our night now is, of the same length shall our day then be, that is, to us at Cambridge 16 houres and 34 minutes. And to those at Elenborough in Scotland, the same day is seventeen houres, and two third parts of an houre, viz. seventeen houres, and 0 minutes.

This quarter continueth untill the tenth day of March, the Sunne, during this time, having his naturall motion in passing through these three signes, Capricorn, Aquarius, and Pisces.

In the which time, continuing the space of 89 daies, 56 minutes, the length of the day with us will be increased 4 houres 34 minutes; and to the 11 of June 9 houres 8 minutes, which (by an equall division of this quarter) giveth for every 22 daies and a quarter, the daies increase to be one houre; which the vulgar people accompt 15 daies to one houre, But (by reason of the obliquitie of the Ecliptique, the motion of the Sunne, and chiefly the great obliquitie of the whole Sphære, in this our Latitude of 52 degrees and 7 minutes)

minutes) the increase of the length of the daies is as followeth: that is, from the eleventh of December to the fiftenth of Ianuarie, containing 34 daies, the day is increased one houre.

From the 15 of Ianuarie to the 2 of February, containing 18 daies, the day is increased one houre.

From the second of Februarie to the seventeenth, containing 15 daies, the day is increased one houre.

From the 17 of February to the third of March, containing 14 daies, the day is increased one houre.

From the third of March to the 19, containing 16 daies, the daies increase one houre.

From the 19 of March to the third of Aprill, containing 16 daies, the daies increase one houre.

From the third of Aprill to the 19, containing 16 daies, the daies increase one houre.

From the 19 of Aprill to the 7 of May, containing 18 daies, the daies increase one houre.

And from the 7 of May to the 8 of Iune, containing 33 daies, the daies increase one houre. Whatsoever further you desire for the length of every day, with the time of Sun-rise and set; you shall finde in the Kalender, without respect of the refraction of the Sun, which is different both for time and place: therefore here I willingly omit it,

## The Spring Quarter.

**T**he tenth day of March, the Sunne entred into the first point of the Ecliptique, being the same point which crosseth the Equator, then making 12 houres day, and 12 houres night throughout the world. And this time is accounted to be the beginning of our Spring; from which time untill the 13 of September, the daies are longer then the nights: yet this Quarter continueth no longer then the daies are increasing in length (viz.) untill the 11 day of Iune. This Quarter continueth the time of the Sunnes pro-

gress

grosse through these three Signes, viz. Aries, Taurus and Gemini containing the space of 9, daies, 2 houres, and 9 minutes; which is foure daies, three houres, and three minutes longer then the Winter Quarter.

## The Summer Quarter.

The eleventh day of June, the Sunne entereth into the first solstitial point of Cancer, beginning then our Summer, causing then the fruits of the Earth to grow towards their ripening. And this is to all those that inhabit on the Northside of the Equinoctiall line, their longest Artificiall day; and to all on the Southside, their shortest day.

This Quarter continueth untill the 13 day of September, during which time, the Sunne declineth towards the Equator which is the time of the Sunne his Period through these three Signes, Cancer, Leo, Virgo containing the space of 93 daies, 11 houres, and 25 minutes which is 11 daies, 13 houres, and 29 minutes longer then the Winter quarter; and 10 houres, 26 minutes longer then the Spring quarter.

## The Autumnall Quarter.

The 13 day of September, the Sunne entereth into the Autumnall Equinoctiall point, making againe the day and night artificiall of one equall length.

This quarter continueth untill the 11 day of December, the Sunne declining to his Southerne Tropique; in which time, containing 89 daies, 10 houres, and 56 minutes, he moveth through Libra, Scorpio, and Sagittarius.

# The use of those Numbers in the 7

*Columnne or space in this Almanacke, in every Moneth of this year, 1629.*

**I**n the seventh Columnne (or space) in every moneth in this Almanacke you shall finde the houre and minute of the Sunne rising for every day. The use is thus: Double the houres and minutes of the Sunnes rising, and you have the length of the same night. Again, take the houres and minutes of the Sunnes rising out of twelve houres, and that which remaineth is the time of Sun-setting: which being doubled is the length of the same day.

So have you  $\left\{ \begin{array}{l} \text{The length of the day} \\ \text{The length of the night} \\ \text{The time of Sun-ris} \\ \text{The time of Sun-set} \end{array} \right\}$  every day in the yeare.

Observe this plaine and generall rule,

**As** many minutes the Sunne  $\left\{ \begin{array}{l} \text{riseth before} \\ \text{ie. teth after} \end{array} \right\}$   $\begin{array}{|c|c|c|c|c|c|} \hline 4 & 5 & 6 & 7 & 8 & 9 \\ \hline 8 & 7 & 6 & 5 & 4 & 3 \\ \hline \end{array}$

And so the contrarie: for,

**As** many minutes the Sunne  $\left\{ \begin{array}{l} \text{setteth after} \\ \text{riseth before} \end{array} \right\}$   $\begin{array}{|c|c|c|c|c|c|} \hline 3 & 4 & 5 & 6 & 7 & 8 \\ \hline 9 & 8 & 7 & 6 & 5 & 4 \\ \hline \end{array}$

whiche two numbers of Sunne-rise, and Sunne-set, make 12 houres.

When the Day is  $\begin{array}{|c|c|c|c|c|c|c|c|} \hline 8 & 9 & 10 & 11 & 12 & 13 & 14 & 15 & 16 \\ \hline \end{array}$  hour. long.

Then the Night  $\begin{array}{|c|c|c|c|c|c|c|c|} \hline 16 & 15 & 14 & 13 & 12 & 11 & 10 & 9 & 8 \\ \hline \end{array}$

And so contrarie: for the length of day and night make 24 ho.

Concerning the minutes, remember this alwaies, that

Threescore	} minutes do make	one houre.
Fortiesix		three quarters.
Fortie		two third parts.
Thirtie		halfe an houre.
Twentie		one third part,
Fifteen		one quarter.

These are so plain, that Example needeth not.

Of Elections Medicinall.

The Bodie of Man is daily subject to diseases and infirmities, and requireth great care and diligence to be had in conserving and keeping the health thereof. Therefore have I let downe these principall rules for Bleeding, Purging, Bathing, and Sweating, wishing they may be used as necessarie requireth; especially upon such dates, as (according to their severall administrations) are noted in these rules of Election following.

In { Bleeding  
Purging  
Bathing  
Sweating } consider if you } to keep health,  
minister } to cure diseases,

First, if to keep the Bodie in health, then

Respect the State of the bo- die for these 4 things,	1 Age	{	Pouth.	{	2 Con- stitution	{	Grossnes.	
			Mans=state.				Leannes.	
			Age					
			Decrepit age.					
	2 Com- plexion	{	Hot and dry.	{	4 Time of the yeare	{	Spring, best.	
			Hot and moist.				harbest mean.	
			Cold and dry.				Summer too hot.	
			Cold & moist.				Winter too cold	
Bleed from the age of	{ 12 -4 36 48 }	to	{ 24 36 48 60 }	yeare, the in the	{ 1 2 3 4 }	quar- ter	{	Sanguine, in X
								Cholerick, & X
								Phlegmatick, & X
								Melancholy & X

The bodie very grosse, or very leane, bleed not.

To order the bodie before bleeding.

A Physician ought to be received three times at the least before a vein be opened; but if time do not permit this, then a Glister would be used the night before And then open a vein in the morning fasting, an houre or two after Sunn-rising and draw such a quantitie as shall be thought fit by a skillfull Physician.

Respect also must be had to these quantities of blood, according to the complexions of the Patients: viz.

Those that are	{	Malancholique	{	may bleed	{	most of all
		Sanguine		lesse then they.		
		Cholericke		lesser.		
		Phlegmaticque		least of all.		

After bleeding may be permitted a draught of Clarret wine with a posse: and use meates of a light digestion untill the third day, during which time

Refrain from	{	Riding.	{	and	{	Running.
		Reaping.		Walking.		
		Wrestling.		Fencing.		
		Tennis		Houling.		
		Bathing.		Unus.		

¶ To order the Bodie that shall purge.

Let the patient receive a preparative, (according as the nature of the humours to be purged shall require) three, foure, or five daies before he purge: and not waite into the aife upon the day of purging, untill the medicine have wrought the full operation.

¶ To order the Bodie after purging.

This is left to the skilfull opinion of him that ministrereth; for sometimes the Bodie fallerh into a strange Symptoma; therefore the Physitian ought not to be absent, untill he be sure that all dangers are past,

¶ Of Bathing.

The Moon in	{	Libra, or Pisces, bath for cleanlinesse.
		Aries, Leo, or Sagittar. bath grosse bodie.
		Cancer, Scorpio, or Pisces, bath dry bodie.

After Bathing dry the body with hot clothes, and lie in a bed with clean sheetes an houre or two.

¶ Of Sweating.

Use the same order as in Bathing, &c.

Secondly,

Secondly, If the Bodie require medicine to cure diseases, then consider these rules following; viz.

In the Bodie, the Age  
Complexion } of the sick patient.  
Strength }

In the disease, the Beginning  
Augmentation } either } uniuersall.  
State present } particular.  
Declination }

Also consider the Nature of the disease to be cured.  
Qualitie of the medicine that cureth.  
Operation manuell and externall.  
Administration medicinall and internal.

These and such like duly obserued, then proceed according to Art: As time will permit: the disease require: and the Bodie endure.

Do: waiting for the chosen } moneths } least delay cause  
dates } further perill.  
houres }

Alwaies remembering that you giue no purging medicine when the Moone is in Leo: nor open a vein, or make incision, when the Moone is in the signe that ruleth ouer that member where that operation is to be done.

## Elections of Husbandrie.

Plant and graft the Moone increasing in Taurus, or Aquar.  
fell Timber from Lammas till Christmas, ) increasing.  
fell Coppice and fetwell, the Moone in the first Quarter.  
Cut your vines, in Februarie or March.

Seld Cattell, the Moone in Aries, Sagittarius, or Capricorn.  
Remove trees, the Moone in the last quarter of November.

Shear Sheep, and cut haire, the Moone increasing.

Gather fruit, herbs, and flowers, at the full Moone.

The winde being East or North-east, it is not good to plant  
to graft, or cut any trees or plants, whereof you expect  
any good.

**A plain Description of the High-waies**  
*in England and Wales, now the second time*  
*enlarged, in a more perfect manner then here-*  
*tofore hath been published with the use of*  
*the same by Example, viz*

From *Cambridge* to *London* 44 miles, thus accounted :

¶ From *Cambridge* to *Fulmyre* 6 miles, from *Fulmyre* to *Barke-*  
*way* 6 miles, from *Barkeway* to *Puckridge* 7 miles, from  
*Puckridge* to *Ware* 5 miles, from *Ware* to *Waltham* 8 miles,  
from *Waltham* to *London* 12 miles. And the next numbers  
do shew how farre it is from any of those Townes (by the  
way) to *London*. As from *Fulmyre* to *London* 38 miles, from  
*Barkeway* 32, from *Puckridge* 25, from *Ware* 20, and from  
*Waltham* 12 miles. The same order holdeth throughout  
these Tables.

From <i>Cambridge</i> to <i>London</i> .		m. 44

What man is now but doth desire to count,  
 If comings in or layings out furmount:  
 Within this Table plain it doth appeare,  
 Thy daily charge to cast each Moneth and Yeare.

By the Day.	By the Moneth, or 28 dayes.	By the Year, 365 dayes.
